Rail Vision Announces First Quarter 2022 Financial Results

July 6, 2022

 [PDF Version](#)

RA'ANANA, Israel, July 06, 2022 (GLOBE NEWSWIRE) -- Rail Vision Ltd. (Nasdaq: RVSN) ("Rail Vision" or the "Company"), a development stage technology company seeking to revolutionize railway safety and the data-related market, today reported financial results for the first quarter ended March 31, 2022.

"The first quarter of 2022 was a truly transformational period for Rail Vision that culminated with our Nasdaq IPO, which provided us with critical funding to accelerate the commercial rollout of our game-changing, artificial-intelligence-driven technology for the rail industry," said Shahar Hania, CEO of Rail Vision. "I am tremendously proud of the work our team has accomplished in strengthening our foundation for future successes. The results from multiple LTPs underway, nearing completion, and even completed, for major potential customers gives us strong confidence in the potential for our technology to ultimately make a significant impact on rail safety globally."

"As we continue to execute LTPs and begin delivering commercial systems to customers, our team is collecting important data through our cloud infrastructure that empowers further refinement of current systems while uncovering potential new opportunities for

growth,” continued Hania. “I am extremely excited for the future and believe Rail Vision is at the forefront of an evolution in train safety.”

First Quarter 2022 & Recent Highlights

- Delivered a main-line system to Hitachi Rail Australia for long-term pilot (“LTP”) with Rio Tinto Iron Ore (“RTIO”), the world’s second-largest metals and mining company. Rail Vision’s main-line system was installed on RTIO’s autonomous locomotives, and the LTP is underway as scheduled and is expected to continue through the end of July 2022. RTIO is also evaluating further use cases that may expand the LTP and include additional testing programs throughout the second half of 2022.
- Completed a four-month LTP of Rail Vision’s main-line system with Israel Railways Ltd., the government-owned operator of the national heavy rail system in Israel. Israel Railways is currently evaluating the main-line system for freight locomotives.
- Completed the data acquisition phase and executed a successful demo of the Company’s advanced automated monitoring system for a US-based railway infrastructure and maintenance company. Negotiations for the next stage of development and delivery of systems is now underway.
- Rail Vision’s ordinary shares and warrants began trading on the Nasdaq Capital Market on March 31, 2022, under the symbols “RVSN” and “RVSNW,” respectively. On April 4, 2022, the Company closed its IPO, in which the Company issued 3,787,241 units. Each unit included one ordinary share and a warrant to purchase one ordinary share at an exercise price of \$4.13. Gross proceeds for the offering were approximately \$15.6 million, before deducting underwriting discounts, commissions, and estimated offering expenses. As this offering closed subsequent to quarter end, the proceeds from the offering are not reflected on the Company’s financial statements for the first quarter of 2022.

First Quarter 2022 Financial Results

- Research and development (“R&D”) expenses, net for the three months ended March 31, 2022 were \$1,423,000 compared to \$2,094,000 in the three months ended March 31, 2021. The decrease is primarily related to a year-over-year decline in R&D staffing and a decrease in share-based compensation . The Company anticipates R&D expenses will increase in subsequent quarters as staffing levels expand.

- General and administrative expenses for the three months ended March 31, 2022 were \$813,000 compared to \$885,000 in the three months ended March 31, 2021. The decrease is primarily attributed to a decrease in share-based compensation offset by an increase in professional services related to the Company being a public company.
- Net loss for the three months ended March 31, 2022 was \$2,346,000, or \$0.26 per ordinary share, compared to a net loss of \$2,968,000, or \$0.32 per ordinary share, in the three months ended March 31, 2021. The decrease in the net loss is attributed mainly to the decrease in R&D and share-based compensation expenses as detailed above.
- Rail Vision ended the first quarter of 2022 with \$2.2 million in cash and cash equivalents.

About Rail Vision Ltd.

Rail Vision is a development stage technology company that is seeking to revolutionize railway safety and the data-related market. The company has developed cutting edge, artificial intelligence based, industry-leading technology specifically designed for railways. The company has developed its railway detection and systems to save lives, increase efficiency, and dramatically reduce expenses for the railway operators. Rail Vision believes that its technology will significantly increase railway safety around the world, while creating significant benefits and adding value to everyone who relies on the train ecosystem: from passengers using trains for transportation to companies that use railways to deliver goods and services. In addition, the company believes that its technology has the potential to advance the revolutionary concept of autonomous trains into a practical reality. Forward-Looking Statements

This press release contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act and other securities laws. Words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates” and similar expressions or variations of such words are intended to identify forward-looking statements. For example, the Company is using forward-looking statements when it discusses the progress in the LTP with RTIO, and that the Company continues to execute LTPs and begin delivering commercial systems to customers. Forward-looking statements are not historical facts, and are based upon management’s current expectations, beliefs and projections, many of which, by their nature, are inherently uncertain. Such expectations, beliefs and projections

are expressed in good faith. However, there can be no assurance that management's expectations, beliefs and projections will be achieved, and actual results may differ materially from what is expressed in or indicated by the forward-looking statements. Forward-looking statements are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in the forward-looking statements. For a more detailed description of the risks and uncertainties affecting the Company, reference is made to the Company's reports filed from time to time with the Securities and Exchange Commission ("SEC"), including, but not limited to, the risks detailed in the Company's annual report on Form 20-F filed with the SEC on May 16, 2022. Forward-looking statements speak only as of the date the statements are made. The Company assumes no obligation to update forward-looking statements to reflect actual results, subsequent events or circumstances, changes in assumptions or changes in other factors affecting forward-looking information except to the extent required by applicable securities laws. If the Company does update one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect thereto or with respect to other forward-looking statements.
